

Wilson's School Maths Circle

Differential Equations and how to solve them

March 25 2024, 4 – 5 pm

The JJ Hall, Wilson's School

DR NEILL COOPER
Retired Head of Further Mathematics,
Wilson's School

Dr Cooper will explain what Differential Equations are and how you can solve them. These equations are fundamental to mathematical modelling and solving problems in many study areas, including Physics, Chemistry, Biology, Engineering and Economics. Dr Cooper will illustrate some of the applications of Differential Equations to these disciplines.
